SKILLS

- **ETL & Data Integration:** Informatica PowerCenter 10.x, Informatica BDM, SQL, Data Warehousing, CDC-based ETL Processing
- **Big Data & Cloud:** Hadoop, Hive, Spark, Azure Data Lake, Azure Fundamentals
- **Automation & Scripting:** Unix Shell Scripting, PowerShell, PySpark, Python
- **Scheduling & DevOps**: CA Workload Automation (ESP), GitLab CI/CD, ServiceNow (SNOW)
- **Methodologies:** Agile, Scrum, Production Support
- **Mainframe Technologies:** IBM Mainframe, BlueZone Terminal Emulator
- **Databases:** SQL, IBM DB2, Hive, Netezza

PROFILE SUMMARY

ETL Developer with 5+ years of experience designing and developing enterprise ETL solutions using Informatica PowerCenter, Informatica BDM, SQL, and Unix in Banking and AML domains. Experienced in developing ETL workflows supporting CDC-based data integration, working with IBM Mainframe source and target systems, BlueZone terminal emulator, and high-volume production environments. Strong expertise in ETL optimization, automation, production support, and Agile delivery.

HIGHLIGHTS

- **Big Data Technologies:** Utilized Big Data technologies like Hadoop, Spark, and Hive to process and analyze large datasets, significantly improving the scalability and performance of ETL workflows.
- **Collaboration and Stakeholder Management:** Collaborated with data analysts, and business teams to understand data requirements and deliver customized ETL solutions that met both technical and business needs.
- **Data Integration and Transformation:** Designed and implemented scalable data integration solutions, including data extraction, transformation, and loading (ETL) processes for high-volume, real-time data feeds.
- **Data Migration Projects**: Led successful data migration projects, ensuring smooth data transition, minimizing downtime and data loss risks.
- **Agile Methodology:** Proficient in Agile practices, including Sprint management, maintaining sprint velocity and user story management.

WORK EXPERIENCE

Cognizant Technology Solutions India Pvt Ltd

Truist EDA AML BAU | ETL Developer – Data Engineering *SEP 2024 – PRESENT*

ROLES AND RESPONSIBILITIES:

- **Liaised with clients** to capture daily data requirements, ensuring accurate and timely ETL deliveries.
- *Spearheaded the design and development of complex mappings, sessions, and workflows in **Informatica PowerCenter and BDM**, optimizing ETL processes for high-volume data integration and transformation, ensuring seamless data flow and performance efficiency across systems.[MORE RAW, I HAVE OPTIMIZED, I DESIGNED WF]*
- *Utilized **UNIX** commands for shell scripting and file management. [MORE RAW, LIKE WHAT I ACHIEVED USING THIS]*
- *Managed production activities through RITMS in **SNOW**; deployed developed code to production environments.*
- *Investigated and resolved ETL workflow failures, performed root cause analysis, and ensured timely resolution of production issues while meeting SLA commitments. [MORE ENGAGING, INCIDENTS HANDLED EX.]*

- Executed 30+ scheduled **change implementations**, coordinating cross-functional teams to ensure zero downtime.
- ***Developed an automated script** for a live application to manage catchup activity by monitoring hourly data loads, identifying missing data and ensuring zero SLA breaches for hourly data loads. I have also included an email trigger function to alert the client of any detected data gaps and automatically initiate the missing data load process.*

- ***Implemented and scheduled jobs using CA Workload Automation*** *to streamline and manage data ingestion processes efficiently. Automated history data loads for transaction tables, reducing operational time by 90%.*
- *Designed and implemented optimized data load logic in* ***CRR[define] workflows*** *to capture only active records, improving ETL performance, reducing load time, and enhancing data quality for downstream analytics and reporting.*
- *Improved ETL performance by optimizing CRR data load logic and eliminating unnecessary processing for inactive records*
- *Conducted knowledge-sharing sessions on configuring Netezza, IBM DB2, and Hive (Cloudera) environments, creating comprehensive documentation that accelerated onboarding and ensured consistent ETL process execution for new team members.*
- *Developed and maintained Informatica PowerCenter mappings for Change Data Capture (CDC)-based ETL workflows supporting enterprise banking applications.*
- *Designed and enhanced Informatica mappings using IBM Mainframe datasets as both source and target systems, ensuring reliable high-volume data movement across enterprise applications.*
- *Integrated data between distributed platforms and Mainframe systems for critical banking applications while ensuring data consistency and integrity.*
- *Performed data validation and reconciliation to ensure data quality, consistency, and accuracy across ETL pipelines.*

Truist EDO Data Management BAU | ETL Developer – Data Engineering *APR 2023 – SEP 2024*

ROLES AND RESPONSIBILITIES:

- Gathered and analyzed daily data requirements from clients, ensuring alignment with business objectives.
- *Optimized and developed ETL workflows in Informatica PowerCenter and BDM by creating new mappings, sessions, and workflows, while modifying existing ones to meet evolving business requirements*
- *Implemented* ***Git version control practices****, including branch management and tag creation, improving deployment efficiency by 25%, facilitating seamless code migration to higher environments using* ***GitLab*** *and ensuring error-free migrations across environments.*
- *Documented unit test cases for each subject area.*
- ***Developed a shell script*** *to automate the ingestion of historical data for transaction tables, reducing the timeline from months to weeks. This solution decreased OPS team effort by 90%, requiring only monitoring and reruns for failures, and ensured on-time project delivery.*

BB&T DW Development Projects | ETL Developer – Data Engineering *JUL 2021 – APR 2023*

ROLES AND RESPONSIBILITIES:

- *Developed and enhanced ETL processes using Informatica PowerCenter.*
- **Migrated and validated ETL code** across SIT and QA environments, ensuring error-free production deployment.
- *Validated data loads and managed production activities through RITMS in SNOW.*
- *Prepared comprehensive migration documentation for production releases*
- ***Developed PowerShell automation scripts*** *to validate and compare output files between two servers, generating detailed CSV reports with results (e.g., matches, mismatches, missing files), reducing manual workload by 80%.*

ACHIEVEMENTS

- Automated historical ETL load process, reducing delivery timeline by **70–90%**
- Reduced manual validation workload by **80%** through Script automation.
- Recognized for leading **10+ successful production change implementations** with zero rollback.
- Conducted internal technical sessions to upskill team members on **Informatica and automation tools**.

INTERNSHIP

GenC internship at Cognizant *JAN 2021 - JUN 2021*

SQL, Data warehousing and ETL

- *Hands on experience in **Informatica PowerCenter** and **SQL** Workbench.*
- *Created and managed databases, debugged problems caused by codes.* Executed a Credit Card Management System project, creating, extracting, and transforming multiple tables from flat files and databases.

CERTIFICATIONS

- Microsoft Certified: **Azure Fundamentals** – Microsoft, 2023
- Microsoft Certified**: Azure Data Fundamentals** – Microsoft, 2024
- **Informatica PowerCenter** – **KBA** – Cognizant L&D, Feb 2025
- **GROW** – **Informatica PC Developer-Bot Assessment** – Cognizant L&D, Mar 2025

EDUCATION

Bachelor of Engineering *in Electronics and Communication* from Kumaraguru College of Technology, 2021 | CGPA: **8.46 / 10**
