Ranjithkumar V

DATA ENGINEER

+91 98942 54836
itsvranjith@gmail.com
linkedin.com/in/itsranjith
github.com/itsranjith

PRIMARY SKILLS

- Informatica PowerCenter 10.X
- Informatica BDM 10.X
- Unix Shell Scripting
- Python
- CA Workload Automation

SECONDARY SKILLS

- HDFS
- Hive
- SQL Server
- GitLab

CERTIFICATIONS

- **Microsoft Certified:** Azure Data Fundamentals
- **Microsoft Certified:** Azure Fundamentals

HIGHLIGHTS

- **Big Data Technologies:** Utilized Big Data technologies like Hadoop, Spark, and Hive to process and analyze large datasets, significantly improving the scalability and performance of ETL workflows.
- **Collaboration and Stakeholder Management:** Collaborated with data analysts, and business teams to understand data requirements and deliver customized ETL solutions that met both technical and business needs.
- **Data Integration and Transformation:** Designed and implemented scalable data integration solutions, including data extraction, transformation, and loading (ETL) processes for high-volume, real-time data feeds.
- **Data Migration Projects**: Led successful data migration projects, ensuring smooth data transition, minimizing downtime and data loss risks.
- **Agile Methodology:** Proficient in Agile practices, including Sprint management, maintaining velocity, and user stories managements.

EDUCATION

Completed ***Bachelor of Engineering in Electronics and Communication*** from Kumaraguru College of Technology, 2021

PROFILE SUMMARY

Experienced Data Engineer with over 3 years of expertise in data warehousing and ETL development, specializing in Informatica PowerCenter. Proficient in developing and implementing ETL mappings, and automating ingestion processes to optimize performance. Certified in Azure Fundamentals and skilled in SQL, Python, HDFS, Hive, GitLab, and Shell scripting, with a proven ability to streamline workflows and enhance operational efficiency. Successfully contributed to diverse projects at Cognizant Technology Solutions, delivering innovative technical solutions and driving project success.

WORK EXPERIENCE

Cognizant Technology Solutions India Pvt Ltd

Financial Crimes BAU (ETL Developer - Data Engineering) *JAN 2023 – PRESENT*

ROLES AND RESPONSIBILITIES:

- ***Collaborated with clients*** *to gather daily requirements.*
- *Spearheaded the design and development of complex mappings, sessions, and workflows in* ***Informatica PowerCenter and BDM****, optimizing ETL processes for high-volume data integration and transformation, ensuring seamless data flow and performance efficiency across systems.*
- *Utilized* ***UNIX*** *commands for shell scripting and file management.*
- *Managed production activities through RITMS in* ***SNOW****; deployed developed code to production environments.*
- *Worked on* ***Change Implementations*** *as per the schedule and coordinated with relevant team to implement the changes end to end.*
- ***Led training sessions*** *for new joiners on key processes and technical skills, fostering a collaborative environment and reducing ramp-up time.*
- ***Developed an automated script*** *for a live application to manage catchup activity by monitoring hourly data loads, identifying missing data and ensuring data continuity. The script also included an email trigger function to alert the client of any detected data gaps and automatically initiate the missing data load process.*
- ***Implemented and scheduled jobs using CA Workload Automation*** *to streamline and manage data ingestion processes efficiently. Automated history data loads for transaction tables, reducing operational time by 90%.*

Fraud Audit Initiative (ETL Developer - Data Engineering) *JUN 2022 – DEC 2023*

ROLES AND RESPONSIBILITIES:

- *Communicate with customer to get the requirements on daily basis with team.*
- *Created mappings, sessions, and workflows in* ***Informatica PowerCenter & BDM.***
- *Modified existing mappings to accommodate new business requirements.*
- *Worked on Git functions such as git push, merge, and branch/tag creation to optimize deployment processes, facilitating seamless code migration to higher environments using GitLab, while leveraging* ***GitLab*** *CI/CD pipelines to ensure efficient code promotion across environments and reduce manual effort by 90%.*
- *Automated data ingestion processes by scheduling and orchestrating jobs in* ***CA Workload Automation****.*
- *Documented unit test cases for each subject area.*
- ***Developed a shell script*** *to automate the ingestion of historical data for transaction tables, reducing the timeline from months to weeks. This solution decreased OPS team effort by 90%, requiring only monitoring and reruns for failures, and ensured on-time project delivery.*

Finance and Risk Data Delivery (ETL Developer - Data Engineering) *JUN 2021 – JUNE 2022*

ROLES AND RESPONSIBILITIES:

- *Developed and enhanced ETL processes using Informatica PowerCenter.*
- *Performed code migration and unit testing in SIT and QA environments.*
- *Validated data loads and managed production activities through RITMS in SNOW.*
- *Prepared comprehensive migration documentation for production releases*
- ***Developed PowerShell automation scripts*** *to validate and compare output files between two servers, generating detailed CSV reports with results (e.g., matches, mismatches, missing files), reducing manual workload by 80%.*

INTERNSHIP

GenC internship at Cognizant *JAN 2021 - JUN 2021*

SQL, Data warehousing and ETL

- *Hands on experience in* ***Informatica PowerCenter*** *and* ***SQL*** *Workbench.*
- *Created and managed databases, debugged problems caused by codes. Done a project on Credit Card Management System, where I have created, extracted and transformed different tables stored in flat files and databases*
