RANJITHKUMAR V

Data Engineer | ETL Developer

Chennai, India | +91 98942 54836 | itsvranjith@gmail.com | linkedin.com/in/itsranjith | github.com/itsranjith

SUMMARY

Results-driven Data Engineer / ETL Developer with 5+ years of experience designing, building, and optimizing enterprise data pipelines using Informatica PowerCenter, Informatica BDM, SQL, Unix, Hadoop, Hive, and Spark across banking and Anti-Money Laundering (AML) environments. Proven track record in ETL performance optimization, production automation, CDC-based data integration, mainframe data processing, and high-volume data movement, delivering 80-90% reductions in operational effort and 70-90% faster historical data delivery.

SKILLS

- ETL & Data Integration: Informatica PowerCenter 10.x, Informatica BDM, Change Data Capture (CDC), ETL Development, Data Warehousing, Data Validation and Reconciliation
- Databases: SQL, IBM DB2, Netezza, Hive
- Big Data & Cloud: Hadoop, Hive, Spark, PySpark, Azure Data Lake, Snowflake
- Scripting & Automation: Unix Shell Scripting, Python, PowerShell
- Scheduling & DevOps: CA Workload Automation (ESP), GitLab CI/CD, Git, ServiceNow
- Enterprise Systems: IBM Mainframe, BlueZone Terminal Emulator

EXPERIENCE

ETL Developer - Data Engineering, Cognizant Technology Solutions India Pvt Ltd (Client: Truist - EDA AML BAU)

Sep 2024 - Present

- Delivered 30+ production implementations within client-committed timelines across critical banking applications including CRR, KYC, IFRM, PB Spectrum, and WLF, maintaining zero production downtime.
- Engineered complex CRR extract workflows integrating multiple sources through Previous/Current/Delta processing, combining EDL Hive data with Netezza targets and DB2 consumption through multi-stage transformations, lookups, and business rules.
- Optimized daily KYC data loading into DB2 by replacing a 6+ hour full-table load with a staging-to-main incremental processing design, reducing unnecessary data movement and improving resource utilization and batch efficiency.
- Improved CRR ETL processing efficiency by implementing application-wise partitioning for large-volume data loads, enabling parallelized partition-level processing and reducing overall batch execution time.
- Modernized existing EDL data-integration workflows by converting Informatica BDM mappings to support Snowflake and cloud-storage integration, enabling migration of ETL pipelines to a modern cloud data platform.
- Automated hourly data-load recovery with monitoring logic that identifies missing loads, triggers catch-up processing, and sends email alerts, achieving zero SLA breaches for hourly data feeds.
- Automated historical transaction-table loads using CA Workload Automation, reducing operational effort by 90% by replacing manual execution with scheduled processing and monitoring.
- Built and maintained CDC-based Informatica PowerCenter workflows supporting enterprise banking applications and incremental data integration.
- Integrated IBM Mainframe, EDL Hive, Netezza, and DB2 environments to support high-volume enterprise data movement and downstream banking applications.
- Resolved production ETL incidents through root-cause analysis, troubleshooting workflow failures, data discrepancies, and load issues while meeting client SLA commitments.
- Validated and reconciled source-to-target data across ETL pipelines to identify discrepancies and ensure accurate downstream consumption.

ETL Developer - Data Engineering, Cognizant Technology Solutions India Pvt Ltd (Client: Truist - EDO Data Management BAU)

Apr 2023 - Sep 2024

- Developed and optimized Informatica PowerCenter and BDM ETL workflows, creating new mappings and modifying existing pipelines to support evolving banking data requirements.
- Improved deployment efficiency by 25% through Git-based branching and tagging practices in GitLab, enabling controlled promotion of ETL code across environments.
- Automated historical transaction-data ingestion, reducing delivery timelines from months to weeks and cutting operations effort by 90%, limiting operations primarily to monitoring and failure reruns.
- Standardized ETL validation through subject-area unit-test documentation, improving traceability and consistency prior to deployment.

ETL Developer - Data Engineering, Cognizant Technology Solutions India Pvt Ltd (Client: BB&T - DW Development Projects)

Jul 2021 - Apr 2023

- Developed and enhanced Informatica PowerCenter ETL pipelines supporting enterprise data-warehouse processing and downstream reporting requirements.
- Validated and migrated ETL code across SIT and QA environments, identifying defects before production deployment and supporting reliable release execution.
- Reduced manual output-validation workload by 80% by developing PowerShell automation that compared files across servers and generated CSV reports identifying matches, mismatches, and missing files.
- Improved production release consistency by creating migration documentation and standardized validation steps for ETL deployments.
- Supported production ETL operations through ServiceNow/RITMS, validating data loads and resolving deployment and processing issues across enterprise workflows.

SELECTED IMPACT

- Reduced operational effort by 90% through historical data-load automation.
- Reduced manual file-validation effort by 80% through PowerShell automation.
- Reduced historical ETL delivery timeline by 70-90%.
- Improved deployment efficiency by 25% through Git/GitLab practices.
- Delivered 30+ production implementations within client-committed timelines.

SQL | Data Warehousing | ETL Intern, Cognizant - GenC Internship

Jan 2021 - Jun 2021

- Built hands-on ETL solutions using Informatica PowerCenter and SQL Workbench.
- Developed a Credit Card Management System involving extraction and transformation of data from flat files and relational databases.
- Created and managed database objects and performed SQL-based data validation and troubleshooting.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900) - Microsoft, 2023
- Microsoft Certified: Azure Data Fundamentals (DP-900) - Microsoft, 2024
- Informatica PowerCenter Certification - Cognizant L&D, 2025
- GROW - Informatica PC Developer-Bot Assessment - Cognizant L&D, 2025

EDUCATION

Bachelor of Engineering - Electronics and Communication Engineering

Kumaraguru College of Technology | Coimbatore, India | Graduated 2021 | CGPA: 8.46/10
